NOTICE OF PRIVACY PRACTICES

UNIVERSITY OF CALIFORNIA RIVERSIDE HEALTH

THIS NOTICE DESCRIBES HOW MEDICAL INFORMATION ABOUT YOU MAY BE USED AND DISCLOSED AND HOW YOU CAN GET ACCESS TO THIS INFORMATION.

PLEASE REVIEW IT CAREFULLY.

UCRH

UC Riverside Health (UCRH) is one of the health care components of the University of California. The University of California health care components consist of the UC medical centers, the UC medical groups, clinics and physician offices, the UC schools of medicine and other UC health professions schools, the student health service areas, employee health units, and the administrative and operational units that are part of the health care components of the University of California. The University of California, including UCRH, is a teaching and research institution. All patient care is overseen and supervised by an attending physician and provided by a team of health care professionals. Residents, fellows, students and graduate students of health care professions schools may participate in examinations or procedures and in the care of patients as a part of the health care education programs of the institution.

This Notice applies to information and records regarding your health care maintained at UCRH.

OUR PLEDGE REGARDING YOUR MENTAL HEALTH INFORMATION

UCRH is committed to protecting information regarding your mental health treatment and related health care services (“mental health information”) about you. We create a record of the care and services you receive at UCRH for use in your care and treatment.

This Notice tells you about the ways in which we may use and disclose your mental health information. It also describes your rights and certain obligations we have regarding the use and disclosure of your mental health information.

We are required by law to:

- make sure that your mental health information is protected;
- give you this Notice describing our legal duties and privacy practices with respect to mental health information about you; and
- follow the terms of the Notice that is currently in effect.

HOW WE MAY USE AND DISCLOSE MENTAL HEALTH INFORMATION ABOUT YOU

The following sections describe different ways that we may use and disclose your mental health information. For each category of uses or disclosures we will explain what we mean and try to give some examples. Not every use or disclosure will be listed. All of the ways we are permitted to use and disclose information, however, will fall within one of the following categories.

For Treatment. We may use mental health information about you to provide you with medical or psychological treatment or services. We may disclose mental health information about you to doctors, nurses, technicians, students, or other health system personnel who are involved in taking care of you in the health system. For example, a doctor treating you for a mental condition may need to know what medications you are currently taking, because the medications may affect what other medications may be prescribed for you. In addition, the doctor may need to tell the hospital's food service if you are taking certain medications so that we can arrange for appropriate meals that will not interfere or improperly interact with your medication. We may also share mental health information about you with other UCRH personnel or non-UCRH providers, agencies or facilities who are treating you for a medical or psychological condition, in order to provide or coordinate the different things you need, such as prescriptions or types of therapy. We also may disclose mental health information about you to people outside UCRH who may be involved in your continuing

mental health or medical care after you leave UCRH such as other health care providers, transport companies, community agencies and family members.

For Payment. We may use and disclose mental health information about you so that the treatment and services you receive at UCRH may be billed to and payment may be collected from you, an insurance company or a third party. For example, we may need to give information to your health plan about therapy you received at UCRH so your health plan will pay us or reimburse you for the therapy. We may also tell your health plan about a proposed treatment to determine whether your plan will cover the treatment.

For Health Care Operations. We may use and disclose mental health information about you for UCRH operations. These uses and disclosures are made for quality of care and medical staff activities, UCRH health sciences education within UCRH, and teaching programs. Your mental health information may also be used or disclosed to comply with law and regulation, for contractual obligations, patients' claims, grievances or lawsuits, health care contracting, legal services, business planning and development, business management and administration, the sale of all or part of UCRH to another entity, underwriting and other insurance activities and to operate the health system. For example, we may review mental health information to find ways to improve treatment and services to our patients. We may also disclose information to doctors, nurses, technicians, medical and other students, and other health system personnel for performance improvement and educational purposes.

Appointment Reminders. We may contact you to remind you that you have an appointment at UCRH.

Treatment Alternatives. We may tell you about or recommend possible treatment options or alternatives that may be of interest to you.

Health-Related Benefits and Services. We may contact you about benefits or services that we provide.

Fundraising Activities. We may contact you to provide information about UCRH

sponsored activities, including fundraising programs and events. We would only use contact information, such as your name, address and phone number and the dates you received treatment or services at UCRH.

Individuals Involved In Your Care: We may tell your family about your general condition and that you are in the hospital unless you request we do not provide this information. Upon request of a family member and with your consent, we may give the family member notification of your diagnosis, prognosis, medications prescribed and their side effects and progress. If a request for information is made by your spouse, parent, child, or sibling and you are unable to authorize the release of such information, we are required to give notification of your presence in the hospital, except to the extent prohibited by federal law. Upon your admission, we are required to make reasonable attempts to notify your next of kin or any other person designated by you, of your admission, and of your release, transfer, serious illness, injury, or death only upon request of the family member, unless you request that this information not be provided.

Research. The University of California is a research institution. All research projects conducted by the University of California must be approved through a special review process to protect patient safety, welfare and confidentiality. Your mental health information may be important to further research efforts and the development of new knowledge. We may use and disclose mental health information about our patients for research purposes, subject to the confidentiality provisions of state and federal law.

On occasion, researchers contact patients regarding their interest in participating in certain research studies. Enrollment in those studies can only occur after you have been informed about the study, had an opportunity to ask questions, and indicated your willingness to participate by signing a consent form. When approved through a special review process, other studies may be performed using your mental health information without requiring your informed consent. For example, a research study may involve a chart review to compare the outcomes of patients who received one medication to those who received another for the same condition.

As Required By Law. We will disclose mental health information about you when required to do so by federal or state law.
